First power in Kelmė WF (300 MW) & Silesia WF II (137 MW), FID for Tume SF (174 MW)

OFFSHORE WIND

New tender. ARP We took decisions to participate in Lithuania's second 700 MW offshore wind tender and seek partners.

Moray West offshore WF project (882 MW), which is owned by Ocean Winds and us (a minority shareholder of 5%) has successfully supplied its first power to the grid.

Continued works in Curonian Nord.

- We are progressing with ground model, foundation and electrical system concept design activities. - We are preparing for the
- key components / services procurements.

Winners in Estonia.

We, together with our partner CIP, won the 2nd seabed site (Liivi 1) and see it as a natural extension of the Liivi 2 sea area secured in December 2023. We will develop the sites as a single offshore wind project with an expected capacity of 1-1.5 GW¹.

ONSHORE WIND

First power to the grid. Kelmė WF (300 MW) in New Lithuania supplied first

power to the grid.

First power to the grid. Silesia WF II (137 MW) in New Poland supplied first power to the grid.

Land for the development of hybrid projects (314 MW) secured.

We have secured land for the development of hybrid projects (314 MW), i.e., we are planning to develop wind farms near our Latvian solar farms.

+ 50 MW Installed Capacity in Poland.

Silesia WF I (50 MW) has reached COD.

SOI AR

Tauragė SF (22.1 MW) has reached COD.

BESS

+38 MW of grid connection capacity New secured.

We have secured arid connection capacity for our first BESS projects (<290 MW) in Lithuania.

BIOMASS & WTE

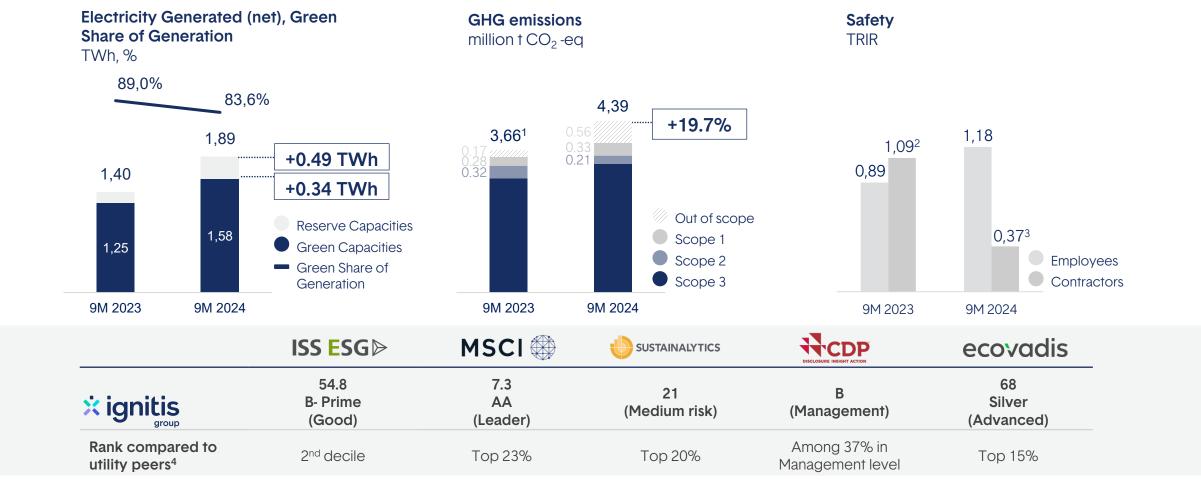

Vilnius CHP biomass unit has reached full COD.

Vilnius CHP biomass unit reached full COD for the remaining 21 MWth and 21 MWe.

Ongoing sustainability initiatives

Continuous decrease in Scope 2 GHG emissions, TRIR below target and high rankings in ESG ratings

^{1. 9}M 2023 emissions have been revised. This change does not affect total 2023 emissions.

^{2.} Contractor TRIR only included contracts above 0.5 EURm/year.

^{3.} Part of the total hours worked for contracts below 0.5 EURm/year may not be included in Contractor TRIR calculations, while all recordable incidents are included.

^{4.} MSCI's Industry-Adjusted Score and comparison with the average of utilities included in the MSCI ACWI Index is presented. The Group is among the 37% of companies in the Energy utility network that have reached the Management level for CDP. In the case of EcoVadis, the assessment score for the entire Group is presented in relation to the rank in the electricity, gas, steam, and air conditioning supply industry (previously reported assessment included only the Group's subsidiary UAB "Ignitis" (Customers & Solutions), therefore the results are not comparable).

Financial performance overview

Adjusted EBITDA and **Adjusted Net Profit** growth was driven by better results in Green Capacities and Networks segments.

Investments decreased slightly YoY but remain at historically high levels.

Adjusted ROCE increased to 10.3%, mainly due to the growth in Adjusted EBITDA, which was partly related to new assets launched.

Strong leverage metrics and credit rating reaffirmed by S&P at 'BBB+' (stable outlook).

Dividends in line with the policy.

Adjusted EBITDA

Growth driven by Green Capacities and Networks

Development across business segments

Launch of new assets and higher captured electricity prices, mainly due to the flexibility of the assets.

Higher RAB, WACC and temporary volume effect.

Strong performance during both periods driven by the utilised option to earn additional return in the market on top of the regulated return. YoY decrease related to extraordinary conditions during Q1 2023.

(9.8) EURm (46.9%)

Lower B2B natural gas supply results partly offset by lower loss from B2C electricity supply and better B2B electricity supply results in Latvia and Poland.

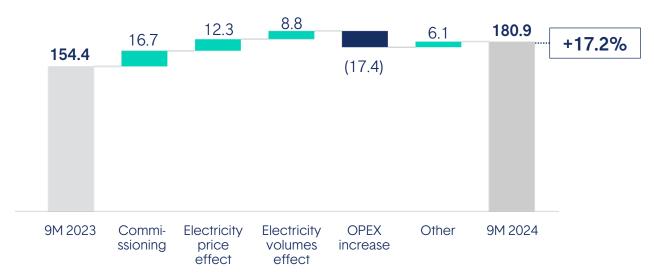

Green Capacities

Remains the largest contributor to the Group's Adjusted EBITDA

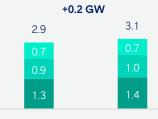

Adjusted EBITDA development APM **EURm**

- Commissioning: new assets launched: Mažeikiai WF, Silesia I WF and Vilnius CHP biomass unit.
- Price effect: higher captured electricity prices, mainly due to flexibility of the assets.
- Electricity volumes effect: the increase in Electricity Generated (net) was driven by Kruonis PSHP, due to a greater number of days with favourable conditions for generation.
- **OPEX increase:** intensive expansion, which led to increased operating expenses.
- Other: mainly due to higher result from heat production and waste management.

Adjusted EBITDA development APM EURm

Market premium: strong performance during both years was driven by the utilised optionality to earn additional return in the market on top of the regulated return.
 However, the YoY decrease is related to the fact that, during the Q1 2023 period, the conditions to earn additional return in the market were extraordinary.

Investments

Continuous large Investments into Green Capacities and Networks

Key drivers

The main reason of decrease is mainly successful completion of several major projects: Silesia WF I and Vilnius CHP biomass unit, while Silesia WF II has reached its final development stage, with COD expected in Q1 2025.

Net Working Capital

Decrease due to lower amounts receivable driven by decrease in gas-related revenue

Key drivers

Decrease in:

- other amounts receivable (-39.1 EURm);
- trade receivables (-37.3 EURm) due to lower energy prices and volumes sold.

Partly offset by:

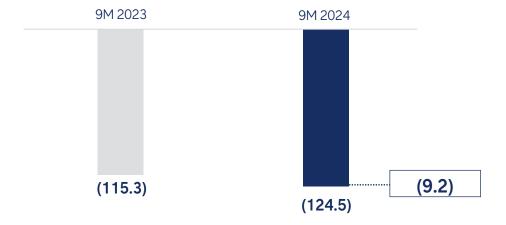

- a decrease in other amounts payable (+28.2 EURm);
- higher inventory (+18.7 EURm) mainly from natural gas.

^{1.} Sustainable Adjusted EBITDA is the share of Adjusted EBITDA related to Taxonomy-aligned activities in total Adjusted EBITDA. The ratio is calculated using the Group's own methodology as it's not based of the EU Commission Delegated Regulation 2021/2178.

^{2.} Minimum dividend per share is calculated based on the No. of shares (72,388,960 ordinary shares). Implied dividend yield (annual) over the 2024–2027 period is calculated based on Ignitis Group's share price: 18.40 €/sh (closing price as of 28th June 2024).

^{3.} Share of Investments to be directed to the maintenance or expansion of the EU Taxonomy-aligned activities. There are differences in methodologies used to calculate Investments and actual Taxonomy CAPEX KPI.
